EXPERIENCE

Personal projects

May 2023 - Present

Design Portfolio Landing Page:

Create a Portfolio Landing Page by combining design and programming.

Use Figma, Photoshop, and Illustrator for the design process. Ensure responsive features on platforms such as laptops, tablets, and iPhones, including Dark Mode.

Design combines creativity through icon, color, typography, system grid, and typewriter effect.

Use React library and Visual Studio Code tool for Frontend programming.

Implement multilingual support feature by using i18next and page navigation feature with React Router.

FREELANCER

October 2022 - 2023

Accepting projects from Facebook groups and working online with clients.

Self-training independently to enhance skills and undertake personal projects are proactive activities I engage in for personal development.

TNHH TMDV QUANG CAO LA DO

March 2020 - September 2022

Working directly with management to create designs that meet customer requirements.

Measuring the size of shelves, advertisements, etc. to create the final product.

Managing the order processing, quotation, and documentation process.

Creating and exporting design files while ensuring print quality.

Performing company procedures.

Completing assigned tasks.
